

Medical History Report - Individual Specimen
ST. LOUIS ZOOLOGICAL PARK

- page 8 -

=====

ELEPHAS MAXIMUS (no subsp)
INDIAN ELEPHANT (E,I)
Name: Clara

Sex: Female
Age: 53Y Est.

Acc. #: 055667
Birth: 14.Apr.1953

=====

Purpose: crack - left rear foot

Prescription Data >>

Starting date: 6.Sep.2005

Drug: PHENYLEBUTAZONE 12000 mg PO SID until further notice

Formulation: 1000.0 mg tablet

Prescribed by: MW (6.Sep.2005)

Filled by: MK (6.Sep.2005)

Drug dosage: .473 mg/kg

Treatment weight: 2536 kg

Clinical Note:

7.Sep.2005

{ Problem: crack - left rear foot (Confirmed)
Due to repeated positive PT and MAPIA serology for mycobacterial antigens, to begin on exposure prophylaxis.

Results of in house chemistry profile - BUN = 17.9 mg/dl, creat 1.4 mg/dl, Ph 10mg/dl, TP = 8.3 g/dl. (REJ)

=====

ELEPHAS MAXIMUS (no subsp)
INDIAN ELEPHANT (E,I)
Name: Clara

Sex: Female
Age: 53Y Est.

Acc. #: 055667
Birth: 14.Apr.1953

Clinical Note:

8.Sep.2005

Problem: crack - left rear foot (Confirmed)
Rx: ISONIAZID 11 g PO SID for 290 doses.
Rx: RIFAMPIN 22 gm PO SID for 290 doses. (REJ)

=====

ELEPHAS MAXIMUS (no subsp)
INDIAN ELEPHANT (E,I)
Name: Clara

Sex: Female
Age: 53Y Est.

Acc. #: 055667
Birth: 14.Apr.1953

=====

Clinical Note:

29.Dec.200

Problem: crack - left rear foot (Confirmed)

O: CBC results - hct 32.9%, WBC 10,300 .22% neuts, 23% lymphs, 55% monos.

Chem panel results - TP 8.7 g/dl, albumin 3.0 g/dl

A: No significant change in blood results. Animal has started to refuse all medicated feeds and even some nonmedicated feeds. OK to discontinue rifampin and isoniazid pending discussion with curator re: test results, quality of life. (MW)
